EDUCATION

Brac University

Bachelor of Computer Science

2022 - 2027

SKILLS

Programing Languages

Python, C, C++, JavaScript, Dart, HTML, CSS, MySQL

Frameworks & Libraries

Flutter, Riverpod, React, Bootstrap, FastAPI, Flask, Arduino, PyTorch, PostgreSQL, ChromaDB

Tools & Platforms

Firebase, Supabase, Docker, LangChain, Postman, Figma, Git

IoT & Robotics

Arduino, ESP32, Raspberry Pi, Control System, RTOS

Architectures & Others

MVC, MVVM, Clean Architecture, Unit Test, Performance profiling, CI/CD(Github Action)

SUMMARY

Final-year Computer Science student building connected-device products, from ESP32 firmware and sensors to the Flutter apps that control them. 3+ years of experience shipping cross-platform mobile apps with Clean Architecture, REST API and payment integration, unit testing, and performance profiling. I take systems apart to understand them, rebuild them cleaner, and use AI agents with custom skills I've built to automate repetitive work.

WORK EXPERIENCE

Flutter Developer Intern

Sugary LLC

Feb 2023 – May 2023

- Learned and applied Clean Architecture.
- Helped in making Admin Panel App, created screens and controllers with GetX.
- integrated RestAPI from a custom backend using dio.
- Learned and used Postman for API testing.

Senior Executive in Research And Project Management

Robotics Club of Brac University

Jan 2022 – Jan 2025

- Led development of Smart Hydroponic Farming, an IoT system using ESP32 and environmental sensors to automate irrigation and monitoring.
- Built LFR for participating in contests
- Took robotics workshop classes and mentored newcomers
- Helped planning and preparing workshop contents

TOP PROJECTS

Leafify App

All-in-one Flutter app for plant identification and care tracking, built around an AI plant-recognition feature. (*Detail on Github)*

Clean Commerce

Full-featured Flutter e-commerce app with Google Pay checkout. practice project for applying Clean Architecture at scale. (*Detail on Github)*

CashFlow

Local-first personal finance tracker with smart analytics, recurring transactions, and budget allocation. (Detail on Github)

Shortest Path Visualizer

Interactive visualizer for common pathfinding algorithms (e.g. Dijkstra, A*, BFS) (*Detail on Github)*
